> “Cloud based services are brilliant. They’re flexible, great for disaster recovery and let you work from anywhere.”

> “However, they are also at risk of data breaches and where your data will be processed & stored”

Check your provider

Does your provider protect your sensitive information when it’s stored in their premises and while processing it?

Review your contract

Read the terms and conditions of use, and ensure the service provider is accountable for the protection of your data.

Read the legal stuff
