John McAlaney, Programme Leader – BSc (Hons) Cyberpsychology

Programme Specification – Section 2

PROGRAMME STRUCTURE

Programme Award and Title: BSc (Hons) Cyberpsychology								
Year 1/Level 4								
Students are required to complete all 6 core units.								
Unit Name	Core/ Option	No of credits	Assessment Element Weightings			Expected contact hours per unit	Unit version no.	HECoS Subject Code
			Exam 1	Cwk 1	Cwk 2			
Experimental Methods and Statistical Analysis	Core	20	50	50		30	v1.1	100497
Qualitative Research Methods	Core	20	50	50		30	v1.0	100497
Biological and Cognitive Psychology	Core	20	50	50		30	v5.1	100497
Social Psychology and Individual Differences	Core	20	50	50		30	v5.1	100497
Developmental and Clinical Psychology	Core	20	50	50		30	v1.1	100497
Human Computer Interaction	Core	20	50	50		30	v1.1	100493
Progression requirements: Requires 120 credits at Level 4								
Exit qualification: Cert HE Psychology (requires 120 credits at Level 4)								

Programme Specification – Section 2

Year 2/Level 5

Students are required to complete all 6 core units.

Unit Name	Core/ Option	No of credits	Assessment Element Weightings			Expected contact hours per unit	Unit version no.	HECoS Subject Code
			Exam 1	Cwk 1	Cwk 2			
Statistics and Research Methods	Core	20	50	50		30	v1.0	100497
Research Methods and Analysis	Core	20	50	50		30	v1.0	100497
Developmental and Applied Cyberpsychology	Core	20	50	50		30	v1.1	100497
Personality, Intelligence and Social Psychology	Core	20	50	50		30	v5.1	100497
Biological Psychology	Core	20	50	50		30	v1.1	100497
Cognition and Language	Core	20	50	50		30	v5.1	100497

Progression requirements: Requires 120 credits at Level 5

Exit qualification: Dip HE PSYCHOLOGY (requires 120 credits at Level 4 and 120 credits at Level 5)

Year 3/Level P - Optional placement year in industry/business

The optional sandwich placement year is taken between Levels 5 and 6.

Progression requirements: Satisfactory completion of a minimum 30-week placement in industry/business. Students who do not choose to undertake the optional sandwich placement may progress directly from Level 5 to Level 6.

Programme Specification – Section 2

Year 3/4/Level 6

Students are required to complete two core units, a core project unit (double weighted) and choose two optional units.

Unit Name	Core/ Option	No of credits	Assessment Element Weightings			Expected contact hours per unit	Unit version no.	HECoS Subject Code
			Exam 1	Cwk 1	Cwk 2			
Psychology Project	Core	40		90	10	39	v5.1	100497
Psychology of Social Media and Videogames	Core	20	50	50		30	v1.1	100497
Cybersecurity and Cyberwarfare	Core	20	50	50		30	v1.0	100497
Forensic Psychology	Option	20	50	50		30	v5.1	100497
Applied Clinical Psychology	Option	20	50	50		30	v5.1	100497
Mind Over Matter in Medicine	Option	20	50	50		30	v1.0	100497
Forensic Applications for Face Processing	Option	20	50	50		30	v5.2	100497
Health Psychology	Option	20	50	50		30	v5.1	100497
Educational Psychology and Special Educational Needs	Option	20	50	50		30	v5.1	100497
Cultural Psychology	Option	20	50	50		30	v1.2	100497
Current Trends in Cognitive and Clinical Neuroscience	Option	20	50	50		30	v1.1	100497
Counselling Psychology	Option	20	50	50		30	V1.1	100495
Emotions, Mental Health and Affective Neuroscience	Option	20	50	50		30	v1.1	100497
Neuroimaging	Option	20	50	50		30	v1.1	100497

Exit qualification: BSc (Hons) Cyberpsychology

Sandwich UG award: Requires 120 credits at Level 4, 120 credits at Level 5, 120 credits at Level 6 and successful completion of a placement year.

Full-time UG award: Requires 120 credits at Level 4, 120 credits at Level 5 and 120 credits at Level 6.

AIMS OF THE DOCUMENT

The aims of this document are to:

- define the structure of the programme;
- specify the programme award titles;
- identify programme and level learning outcomes;
- articulate the regulations governing the awards defined within the document.

AIMS OF THE PROGRAMME

This programme aims to develop individuals with a high level of understanding and insight into empirical and theoretical issues into graduates who can:

- demonstrate a critical understanding of Psychology as an empirical science;
- develop a well-founded knowledge and critical understanding of the mind and behaviour through learning about all areas of Psychology;
- acquire a range of research skills and methods to investigate traditional and online behaviour, culminating in an ability to conduct research independently;
- apply their knowledge effectively in a variety of contexts involving human interaction via the internet.

It has been developed with regard to a number of points of reference, particularly QAA Psychology Subject Benchmark Statement (2016) and the British Psychological Society Accreditation Handbook (2017) and Code of Ethics & Conduct (2018). The programme encompasses all areas of psychology identified by these bodies. It provides a sound theoretical underpinning and practical experience in psychology and empirical methods to enable students to begin a career in professional psychology. Applied themes will enable students to have a real understanding of the how the different professions within psychology use technology and how psychology can be used in other careers where people use technology. For example, the degree will provide a basis for postgraduate studies for professional or academic careers in Psychology as to some extent they all use technology (e.g. clinical, educational, occupational, sports, forensic and health psychology). The degree will also equip students for a range of other careers including cybersecurity, videogames evaluation and implementation, online training, teaching, management consultancy, social media marketing and advertising, health promotion and personnel work.

Cyberpsychology at Bournemouth University aims to bring together research, education and professional practice by:

- a) informing and educating students about Psychology and Cyberpsychology;
- b) developing their understanding of psychological research in traditional and online contexts; and
- c) enabling them to apply this knowledge in a range of practical and professional contexts in Cyberpsychology.

The BSc (Hons) Cyberpsychology will apply for accreditation as conferring eligibility for the Graduate Basis for Chartered Membership (GBC) of the British Psychological Society. It is important to note that GBC can only be awarded if the student obtains a pass for the dissertation and a Lower Second Class (2:2) classification or above.

ALIGNMENT WITH THE UNIVERSITY'S STRATEGIC PLAN

The BSc Cyberpsychology programme is informed by and aligned with Bournemouth University's 2018-2025 strategic plan. This programme will inspire learning, advance knowledge and enrich society through the fusion of excellent teaching, world-class research and practice that is at the heart of the institution's visions and values. The academics delivering the programme are actively engaged in research, permitting opportunities for co-creation and co-production of knowledge between staff and students. Additionally, teaching excellence is ensured by the sharing of good teaching practice across the programme (via staff handbooks that guide teaching and feedback protocols). Moreover, external practitioners contribute to the programme to provide information on what professional psychology

Programme Specification - Section 2

practitioners actually do (as well as having chartered clinical, forensic and sport/exercise psychologists on the programme teaching team).

Consistent with the principles of Fusion, students further engage in a range of innovative coursework activities, a pedagogical approach well aligned with the CEL's current delivery focus, offering students the opportunity to learn by engaging in a series of tasks that have a theoretical/practical focus (e.g., writing practical research reports). This range of assessment is designed to equip students with the full range of skills necessary to succeed in the fields of Psychology and Cyberpsychology. Moreover, the programme fuses research, education and professional practice by: (a) informing and educating students about Psychology and Cyberpsychology; (b) developing their understanding of psychological research in traditional and online contexts; and (c) enabling them to apply this knowledge in a range of practical and professional contexts.

The Psychology Department also supports global activities for students, with students having the opportunity to study abroad, which is in line with the University's Global Engagement Plan.

All Cyberpsychology students also have the option of undertaking a placement year after completing Level 5 of the programme. This industrial placement is assessed on a pass/fail basis and involves the completion of a minimum of 30 working weeks (at a minimum of 30 hours per week), the completion of a placement logbook, and the submission of a placement assignment. Students are supported by a dedicated Psychology Placement Team and have access to a Placement Co-ordinator, Careers Advisor, Placement Tutor and Placement PAL (Peer Assisted Learning) Leaders as well as a Placement Development Advisor when they are out on Placement in their third year.

Further information on the BU 2018-2025 strategic plan and the University's Fusion agenda can be found at: <https://staffintranet.bournemouth.ac.uk/aboutbu/bu2025visionandstrategy/>

LEARNING HOURS AND ASSESSMENT

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. The minimum credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the student, including lectures, seminars, assessment and independent study. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits.

The assessment workload for a unit should consider the total time devoted to study, including the assessment workload (i.e. formative and summative assessment) and the taught elements and independent study workload (i.e. lectures, seminars, preparatory work, practical activities, reading, critical reflection).

Assessment per 20 credit unit should normally consist of 3,000 words or equivalent. Dissertations and Level 6 and 7 Final Projects are distinct from other assessment types. The word count for these assignments is 5,000 words per 20 credits, recognising that undertaking an in-depth piece of original research as the capstone to a degree is pedagogically sound.

STAFF DELIVERING THE PROGRAMME

Students will usually be taught by a combination of senior academic staff with others who have relevant expertise including – where appropriate according to the content of the unit – academic staff, qualified professional practitioners, demonstrators/technicians and research students. The majority of staff delivering lectures have PhDs in cyberpsychology and their ongoing research enables students to learn about topical developments in the field first hand. Additionally, cyberpsychology staff are at the forefront in leading and developing this new sub-discipline in psychology, with contributions to key text books, white papers, conference presentations and part of the new BPS Cyberpsychology section committee. Staff have experience working with a number of local companies and our wide network of links with practitioners ensures that the programme provides real world examples, visiting speakers, placements and undergraduate projects within companies and provides cyberpsychology skills and knowledge highly valued by employers.

INTENDED LEARNING OUTCOMES – AND HOW THE PROGRAMME ENABLES STUDENTS TO ACHIEVE AND DEMONSTRATE THE INTENDED LEARNING OUTCOMES

PROGRAMME AND LEVEL 6 INTENDED PROGRAMME OUTCOMES

<p>A: Subject knowledge and understanding This programme/level provides opportunities for students to develop and demonstrate knowledge and understanding of:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme/level learning outcomes:</p>
<p>A1 Have a sound understanding of the scientific nature of psychology as a discipline and the ability to critically evaluate the scientific credibility of reported research;</p> <p>A2 Have a sound understanding of experimental design principles and be able to design research projects independently;</p> <p>A3 Have an understanding of variability and diversity of psychological functioning and be able to critically evaluate how this is measured psychometrically;</p> <p>A4 Develop research-led knowledge of a range of specialized areas in psychology, with a focus on cyberpsychology;</p> <p>A5 Demonstrate knowledge of a range of research paradigms, methods and measurement techniques and use these appropriately in independent research;</p> <p>A6 Demonstrate knowledge of a range of statistical techniques including appropriate choice and use of statistical analyses;</p> <p>A7 Understand the professional context of psychology and develop an understanding of their possible role in professional psychology, with a focus on cyberpsychology;</p> <p>A8 Understand implications of findings in different areas of professional practice in psychology, with a focus on cyberpsychology.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (A1 – A4; A7; A8); • Seminars (A1 – A4; A7; A8); • Tutorials (A2, A5, A6); • Directed reading (A1, A3; A4); • Use of the VLE (A4, A5); • Independent research (for dissertation) (A2; A5; A6). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (A1 - A3; A5; A7; A8); • Coursework assignments (A1 – A5; A7; A8); • Dissertation (A2; A3; A4 - A6).
<p>B: Intellectual skills This programme/level provides opportunities for students to:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme/level outcomes:</p>
<p>B1 Apply the skills needed for academic study and enquiry effectively;</p> <p>B2 Critically evaluate research from a variety of sources;</p> <p>B3 Evaluate and synthesise information from a number of sources in order to gain a coherent understanding of theory and practice;</p> <p>B4 Critically evaluate psychological evidence and use this knowledge in experimental design.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (B1 - B4); • Seminars (B1 – B4); • Tutorials (B4) • Directed reading (B1 – B4); • Use of the VLE (B2 – B4); • Independent research (for dissertation) (B1 – B4).

Programme Specification - Section 2

	<p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (B1- B4); • Coursework assignments (B1 – B4); • Dissertation (B1 – B4).
<p>C: Practical skills This programme/level provides opportunities for students to:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme/level learning outcomes:</p>
<p>C1 Demonstrate competence in research skills by conducting an independent research project;</p> <p>C2 Be aware of ethical principles and demonstrate this in relation to personal study and when conducting independent research;</p> <p>C3 Initiate, design, conduct and report an empirically-based research project under appropriate supervision;</p> <p>C4 Reason statistically and demonstrate competence in choosing and applying a range of statistical methods independently;</p> <p>C5 Reason scientifically and demonstrate a critical understanding of the relationship between theory and evidence;</p> <p>C6 Critically evaluate the appropriateness of methods for different areas of professional practice in psychology, with a focus on Cyberpsychology;</p> <p>C7 Demonstrate an understanding and application of online communication and interaction skills.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (C1 - C3; C5; C6); • Seminars (C1 - C3, C5; C6); • Tutorials (C1, C3, C4); • Directed reading (C2; C5; C6); • Use of the VLE (C2; C5; C6; C8); • Independent research for dissertation (C1 – C6). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (C2, C4 – C6); • Coursework assignments (C1 – C4; C5; C6; C8); • Dissertation (C1, C2, C5).
<p>D: Transferable skills This programme/level provides opportunities for students to:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme/level learning outcomes:</p>
<p>D1 Communicate ideas and research findings effectively while demonstrating sensitivity to the target audience;</p> <p>D2 Apply problem-solving skills in a variety of theoretical and practical situations;</p> <p>D3 Evaluate academic performance and take responsibility for personal learning development;</p> <p>D4 Manage time, prioritise workloads and recognize and manage emotions and stress;</p> <p>D5 Demonstrate the ability to present, evaluate and interpret quantitative and qualitative research;</p> <p>D6 Have a knowledge, and understanding of, effective team working while being sensitive to the needs of others;</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (D1 – D6; D9); • Seminars (D1- D5; D6 – D9); • Tutorials (D1, D5, D6, D9); • Use of the VLE (D1 - D5, D8); • Directed reading (D1 - D5). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Coursework assignments (D1 – D9); • Examinations (D1 – D6); • Dissertation (D1- D5; D7, D8).

Programme Specification - Section 2

<p>D7 Be able to use computers independently for statistical analysis, word processing and presentations;</p> <p>D8 Understand and demonstrate online skills in communication, group work and decision-making;</p> <p>D9 Understand career opportunities and challenges ahead and tailor career planning to their understanding of their own acquired skills, strengths and weaknesses.</p>	
--	--

LEVEL 5 INTENDED LEVEL OUTCOMES

<p>A: Knowledge and understanding This programme/level/stage provides opportunities for students to develop and demonstrate knowledge and understanding of:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level/stage learning outcomes:</p>
<p>A1 An understanding of the scientific underpinnings of psychology as a discipline;</p> <p>A2 A fuller understanding of experimental design principles;</p> <p>A3 An understanding of variability and diversity of psychological functioning and how diversity can be measured psychometrically;</p> <p>A4 Knowledge of core areas in psychology (including biological, cognitive, developmental, individual differences and social psychology) and practice in Cyberpsychology;</p> <p>A5 Knowledge of a range of research paradigms and methods, encompassing both quantitative and qualitative approaches;</p> <p>A6 Knowledge of a range of statistical techniques and an ability to use these appropriately;</p> <p>A7 Knowledge and understanding of the professional context of psychology, with a focus on Cyberpsychology;</p> <p>A8 An awareness of the methodologies appropriate for different areas of professional practice in psychology, with a focus on Cyberpsychology.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (A1 - A8); • Seminars (A1 – A8); • Tutorials (A2, A5, A6); • Practical Workshops (A2, A5, A6); • Directed reading (A1, A3); • Use of the VLE (A4, A5, A7). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (A1 – A8); • Coursework assignments (A1 – A8).
<p>B: Intellectual skills This programme/level/stage provides opportunities for students to:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level/stage learning outcomes:</p>
<p>B1 Apply the skills needed for academic study and enquiry;</p> <p>B2 Analyse and evaluate research from a variety of sources;</p> <p>B3 Evaluate information from a number of sources in order to gain a coherent understanding of theory and practice;</p> <p>B4 Understand psychological evidence and its role in experimental design.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (B1 - B4); • Seminars (B1 – B4); • Tutorials (B1, B4); • Practical Workshops (B1, B4); • Directed reading (B1 – B4); • Use of the VLE (B1 – B4).

Programme Specification - Section 2

	<p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (B1 – B4); • Coursework assignments (B1 – B4).
<p>C: Practical skills This programme/level/stage provides opportunities for students to:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level/stage learning outcomes:</p>
<p>C1 Demonstrate competence in research skills through practical activities;</p> <p>C2 Be aware of ethical principles and be able to demonstrate this in relation to personal study and conducting empirical studies;</p> <p>C3 Initiate, design, conduct and report empirically-based research under appropriate supervision;</p> <p>C4 Reason statistically and demonstrate competence in choosing and applying a range of statistical methods;</p> <p>C5 Reason scientifically and demonstrate the relationship between theory and evidence;</p> <p>C6 Evaluate the appropriateness of methods for different areas of professional practice in psychology and Cyberpsychology;</p> <p>C7 Demonstrate understanding and application of online skills used in Cyberpsychology practice.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (C1 – C6); • Seminars (C1 – C6); • Tutorials (C1 – C4); • Practical Workshops (C1 – C4, C7); • Directed reading (C1 – C6); • Use of the VLE (C1 – C7). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (C1 – C6); • Coursework assignments (C1 – C7).
<p>D: Transferable skills This programme/level/stage provides opportunities for students to:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level/stage learning outcomes:</p>
<p>D1 Communicate ideas and research findings effectively;</p> <p>D2 Apply problem-solving skills in a variety of theoretical and practical situations;</p> <p>D3 Evaluate academic performance and take responsibility for personal learning development;</p> <p>D4 Manage time, prioritise workloads and recognise and manage emotions and stress;</p> <p>D5 Demonstrate the ability to present, evaluate and interpret quantitative and qualitative research;</p> <p>D6 Demonstrate a knowledge, and understanding of, effective team working;</p> <p>D7 Be able to use computers for statistical analysis, word processing and presentations;</p> <p>D8 Demonstrate online skills in communication, group work and decision-making;</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (D1 – D9); • Seminars (D1- D9); • Tutorials (D4, D6, D9); • Practical Workshops (D1, D5, D7, D8); • Use of the VLE (D3, D4, D7, D8, D9); • Directed reading (D1- D9). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (D1 – D9); • Coursework assignments (D1 – D9).

Programme Specification - Section 2

D9 Begin to understand career opportunities and challenges ahead and plan work experience to enhance acquired psychological skills and students' own strengths and weaknesses.	
---	--

LEVEL 4 INTENDED OUTCOMES

A: Knowledge and understanding This programme/level/stage provides opportunities for students to develop and demonstrate knowledge and understanding of:	The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level/stage learning outcomes:
A1 An appreciation of the conceptual, historical and scientific underpinnings of psychology as a discipline and the sub-discipline of Cyberpsychology;	Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> • Lectures (A1 - A8); • Seminars (A1 – A4); • Tutorials (A2, A4, A6-A8); • Practical Workshops (A2, A5, A6, A8); • Directed reading (A1 - A8); • Use of the VLE (A4, A5, A7, A8). Assessment strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> • Examinations (A1 - A8); • Coursework assignments (A1 - A8).
A2 A basic understanding of the principles of experimental design;	
A3 An appreciation of the inherent variability and diversity of psychological functioning;	
A4 A basic knowledge of core areas in psychology (including biological, cognitive, developmental, individual differences and social psychology), and practice in Cyberpsychology;	
A5 The ability to identify a range of research paradigms, research methods and an understanding of both quantitative and qualitative approaches;	
A6 Knowledge of simple parametric and nonparametric statistical analysis techniques and some knowledge of how they are applied appropriately;	
A7 A basic understanding of the professional context of psychology, with a focus on Cyberpsychology;	
A8 An awareness of the methodologies appropriate for different areas of professional practice in psychology, with a focus on Cyberpsychology.	
B: Intellectual skills This programme/level/stage provides opportunities for students to:	The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level/stage learning outcomes:
B1 Apply the basic skills needed for academic study and enquiry;	Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> • Lectures (B1 – B3); • Seminars (B1 – B3); • Tutorials (B1, B3); • Practical Workshops (B1 – B3); • Directed reading (B1 – B3); • Use of the VLE (B1 – B3).
B2 Analyse research from identified sources;	
B3 A basic understanding of psychological evidence and its role in experimental design.	

Programme Specification - Section 2

	<p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (B1 – B3); • Coursework assignments (B1 – B3).
<p>C: Practical skills This programme/level/stage provides opportunities for students to:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level/stage learning outcomes:</p>
<p>C1 Demonstrate basic competence in research skills through practical activities;</p> <p>C2 Be aware of ethical principles and their application in relation to personal study and conducting empirical studies;</p> <p>C3 Design, conduct and report an empirically-based research project under appropriate supervision;</p> <p>C4 Reason statistically and demonstrate competence in choosing and applying a limited range of statistical methods;</p> <p>C5 Reason scientifically and appreciate the relationship between theory and evidence;</p> <p>C6 Become aware of the appropriateness of methods for different areas of professional practice in psychology and Cyberpsychology;</p> <p>C7 Begin to demonstrate understanding and application of online skills used in Cyberpsychology practice.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (C2, C4 – C6); • Seminars (C1 – C7); • Tutorials (C1 – C4, C7); • Practical Workshops (C1 – C7); • Directed reading (C4 – C6); • Use of the VLE (C2, C4 – C7). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (C1 – C6); • Coursework assignments (C1 – C7).
<p>D: Transferable skills This programme/level/stage provides opportunities for students to:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level/stage learning outcomes:</p>
<p>D1 Communicate ideas and research findings by written, oral and visual means;</p> <p>D2 Begin to apply problem-solving skills in a variety of theoretical and practical situations;</p> <p>D3 Evaluate academic performance and take responsibility for personal learning development;</p> <p>D4 Manage time, prioritise workloads and begin to recognise and manage emotions and stress;</p> <p>D5 Demonstrate a basic ability to present, evaluate and interpret quantitative and qualitative research;</p> <p>D6 An appreciation of effective team working;</p> <p>D7 Begin to understand and demonstrate online skills in communication, group work and decision-making.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Lectures (D1, D2, D4, D5) ; • Seminars (D1, D2, D4 – D7); • Tutorials (D1, D4, D6); • Practical Workshops (D1, D2, D5, D6, D7); • Directed reading (D1, D2, D6); • Use of the VLE (D3, D4, D6, D7). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Examinations (D1 – D5); • Coursework assignments (D1 – D7).

ADMISSION REGULATIONS

The regulations for this programme are the University's Standard Undergraduate Admission Regulations.

<https://intranetsp.bournemouth.ac.uk/pandptest/3a-undergraduate-admissions-regulations.pdf>

PROGRESSION ROUTES

Not applicable.

ASSESSMENT REGULATIONS

The regulations for this programme are the University's Standard Assessment Regulations.

<https://intranetsp.bournemouth.ac.uk/pandptest/6a-standard-assessment-regulations-undergraduate.pdf>

However, the following approved exception applies:

In accordance with the standards for accreditation of undergraduate, conversion and integrated Masters programmes by The British Psychological Society (BPS) to confer Graduate Basis for Chartered membership (GBC) of the BPS, marks on the Level 6 research project cannot be compensated (British Psychological Society Standards for the accreditation of undergraduate, conversion and integrated Masters programmes in psychology, section 2.1.4 h, page 13 (published 2019)).

WORK BASED LEARNING (WBL) AND PLACEMENT ELEMENTS

The programme includes an optional one-year work placement which occurs during the third-year of the programme and lasts for a minimum of 30 working weeks. The aim of this optional sandwich placement year is to give students experience of working within an appropriate professional environment, contributing to their potential employability in line with the Bournemouth University employability strategy. The programme also includes an optional 4-week, short-term placement that occurs between the end of the second-year and the start of the third-year. This optional short-term placement scheme aims to give students experience of working within an appropriate professional environment, contributing to their potential employability in line with the Bournemouth University employability strategy. On both placement schemes, students will utilise the skills and knowledge gained during the first two years of the programme in an appropriate work-based environment as they gain practical experience and apply a professional approach in the workplace.
