## Programme Specification – Section 1

### PROGRAMME STRUCTURE

<b>Programme Award and Title:</b>								
<b>Stage 1/Level 7</b>								
Students are required to complete 4 core units and choose 2 optional units								
Unit Name	Core/ Option	No. of Credits	Assessment Element Weightings			Expected Contact hours per unit	Unit Version No.	HECoS Code (plus balanced or major/minor load)
			Exam 1	Cwk 1	Cwk 2			
Research Methods for Health and Social Care (FST)	Core	20		100%		30	FST 1.0	100959 (Major), 100260 (Minor)
Foundations of Health Information Systems	Core	20		100%		30	1.0	100374 100812, (Balanced)
Integrated Digital Healthcare Project	Core	20		100%		30	1.0	100260 (Major), 100812 (Minor)
Human Centred Design	Core	20		100%		30	FST 1.0	100736 (Major), 100753 (Minor)
Data Management	Option	20		100%		30	1.0	100754, 100755, (Balanced)
Blockchain and Digital Futures	Option	20		100%		30	1.0	100376 (Major), 100755 (Minor)
Accessibility and Assistive Technology	Option	20		100%		30	1.1	100736 (Major), 100958 (Minor), 100993 (Minor)
Persuasive Technology and Behaviour Change	Option	20		100%		30	1.0	100374 (Major) 100497 (Minor)
Smart Systems	Option	20		100%		30	1.0	100359 (Balanced) 100373 (Balanced)
<b>Progression requirements:</b> There are no progression requirements.								
<b>Exit qualification:</b> PG Dip Digital Health requires 120 credits at Level 7 (excluding 60 credit Individual Masters Project). PG Cert Computing requires 60 credits at Level 7.								

<b>Stage 2/Level 7</b>								
Students are required to complete the Masters Project.								
Unit Name	Core/ Option	No. of Credits	Assessment Element Weightings			Expected Contact hours per unit	Unit Version No.	HECoS Code (plus balanced or major/minor load)
			Exam 1	Cwk 1	Cwk 2			
Individual Masters Project	Core	60		100%		10	V1.0	100367 (Major), 100962 (Minor)
<b>Exit qualification:</b> MSc Digital Health requires 180 credits at Level 7. PG Dip Digital Health requires 120 credits at Level 7 (excluding 60 credit Individual Masters Project). PG Cert Computing requires 60 credits at Level 7.								

## AIMS OF THE DOCUMENT

The aims of this document are to:

- define the structure of the programme;
- specify the programme award titles;
- identify programme and level learning outcomes;
- articulate the regulations governing the awards defined within the document.

## AIMS OF THE PROGRAMME

This programme aims to develop critically informed, agile and resourceful graduates, who:

- have a critical understanding of advanced theoretical knowledge, methods and concepts of relevant health digital health technologies required for supporting healthcare and social care services and products;
- have specialised technical knowledge and practical skills to take a professional approach to the planning, design and management of digital health products to address real-world healthcare and social care problems;
- have desired transferable and professional skills to widen their employment prospects through relevant digital health practices;
- have advanced research skills to carry out research to develop new/improved digital health solutions using a broad range of methods, tools and technologies as effective independent researchers and/or consultants in their chosen specialised areas;
- are prepared to adapt to future changes in digital health in the healthcare and social care context via a comprehensive understanding of fundamental theories and current practices.

This programme is distinctive in that it provides students whose first degree is within computing and healthcare related disciplines the required knowledge and skills to become visionary digital health technologists, providing a 'fast-track' into the healthcare and social care profession. It is also distinctive in producing graduates who are able to understand the healthcare and social care perspective and create a strategic view of digital health product development, and who can also manage and lead the development of such products and services.

## ALIGNMENT WITH THE UNIVERSITY'S STRATEGIC PLAN

MSc Digital Health is informed by and well-aligned with the BU 2025 strategic plan and the University's fusion agenda. BU identified four strategic investment areas as part of its 2025 strategic plan where digital health plays a vital role in supporting the growth of Medical Science and Assistive Technology subject areas. This programme will complement the broad range of digital health related expertise already spread across the University and it forms an important component of the BU 2025 vision that indicates it can be used to support/inform/improve sustainable social, environmental and economic growth and development. The programme is designed and delivered by academics with a wealth of industrial experience and research excellence and supported by the industries presenting synergised insights into the relevant fields. Through its fusion approach, it also offers students the opportunity to learn by engaging in a series of practical, industry focused tasks as well as a range of co-creation and co-production projects with academics and industrial contacts to acquire hands-on experience and improve their employabilities.

## LEARNING HOURS AND ASSESSMENT

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. The minimum credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the student, including lectures, seminars, assessment and independent study. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits.

## Programme Specification - Section 2

The assessment workload for a unit should consider the total time devoted to study, including the assessment workload (i.e. formative and summative assessment) and the taught elements and independent study workload (i.e. lectures, seminars, preparatory work, practical activities, reading, critical reflection).

Assessment per 20 credit unit should normally consist of 3,000 words or equivalent. Dissertations and Level 6 and 7 Final Projects are distinct from other assessment types. The word count for these assignments is 5,000 words per 20 credits, recognising that undertaking an in-depth piece of original research as the capstone to a degree is pedagogically sound.

### STAFF DELIVERING THE PROGRAMME

Students will usually be taught by a combination of senior academic staff with others who have relevant expertise including – where appropriate according to the content of the unit – academic staff, qualified professional practitioners, demonstrators/technicians and research students.

### INTENDED LEARNING OUTCOMES – AND HOW THE PROGRAMME ENABLES STUDENTS TO ACHIEVE AND DEMONSTRATE THE INTENDED LEARNING OUTCOMES

Graduates from this programme will possess the technical skills and competencies to work as intermediaries between business decision makers and developers. The intellectual skills developed are those of business systems analysts, requirements engineers, systems analysts and project managers. They are expected to become lifelong learners, taking on the challenge of the rapid rate of change and emergence of new knowledge in both business and computing.

### LEVEL 7 INTENDED PROGRAMME OUTCOMES

<p><b>A: Subject knowledge and understanding</b></p> <p>This programme provides opportunities for students to develop and demonstrate knowledge and understanding of:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:</p>
<p><b>A1</b> Principles and techniques of digital health based research;</p> <p><b>A2</b> Enabling technologies for digital health applications;</p> <p><b>A3</b> A rigorous engineering approach to investigating and solving digital health problems such as those in healthcare and socialcare contexts;</p> <p><b>A4</b> The management and development of digital health solutions to address healthcare and social care problems;</p> <p><b>A5</b> The professional, legal, and ethical responsibilities of digital health personnel within the organisational, technical and global contexts in which digital health technology is applied.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> <li>• lectures (A1 – A5);</li> <li>• seminars (A1 – A5);</li> <li>• directed reading (A1 - A5);</li> <li>• independent research (for dissertation) (A1 - A5).</li> </ul>
	<p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> <li>• coursework essays (A1 – A5);</li> <li>• dissertation (A1 – A5).</li> </ul>

## Programme Specification - Section 2

<b>B: Intellectual skills</b>  This programme provides opportunities for students to:	The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme outcomes:
<b>B1</b> Critical thinking, problem-solving and decision-making to solve complex digital health problems; <b>B2</b> Analyse, interpret, synthesis, and critically evaluate information from current research; <b>B3</b> Critically evaluate and justify alternative approaches to solutions development; <b>B4</b> Formulate, plan, execute, and report on a digital health project involving original contributions; <b>B5</b> Communicate findings to professional and academic standards.	Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> <li>• lectures (B1 – B5);</li> <li>• seminars (B1 – B5);</li> <li>• directed reading (B1 – B5);</li> <li>• use of the VLE (B1 – B5);</li> <li>• independent research (for dissertation) (B1 - B5).</li> </ul>
	Assessment strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> <li>• coursework essays (B1 - B5);</li> <li>• dissertation (B1 - B5).</li> </ul>
<b>C: Practical skills</b>  This programme provides opportunities for students to:	The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:
<b>C1</b> Retrieve, select, and evaluate information from a variety of sources; <b>C2</b> Analyse, specify, design and implement digital health applications to meet healthcare and social care goals; <b>C3</b> Select appropriate methods and tools for solving digital health problems; <b>C4</b> Plan, monitor and evaluate the progress of a digital health solution.	Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> <li>• lectures (C1 – C4);</li> <li>• coursework essays (C1 – C4);</li> <li>• independent research for empirical dissertation (C1 – C4);</li> <li>• group exercises (C1 – C4).</li> </ul>
	Assessment strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> <li>• coursework essays (C1 – C4);</li> <li>• dissertation (C1 – C4).</li> </ul>
<b>D: Transferable skills</b>  This programme provides opportunities for students to:	The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning

## Programme Specification - Section 2

	outcomes:
<p><b>D1</b> Demonstrate problem solving skills and the application of knowledge across the discipline areas;</p> <p><b>D2</b> Gather, select, and analyse a range of experimental and fieldwork data and present professionally using appropriate media;</p> <p><b>D3</b> Structure and communicate ideas professionally and effectively to appropriate professional and academic standards;</p> <p><b>D4</b> Demonstrate initiative, self direction and exercise personal responsibility for management of own learning;</p> <p><b>D5</b> Distil, synthesise and critically analyse alternative approaches and methodologies to problems and research results reported in literature and elsewhere.</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> <li>• lectures (D1 - D5);</li> <li>• seminars (D1- D5);</li> <li>• use of the VLE (D1 - D5);</li> <li>• directed reading (D1- D5).</li> </ul> <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> <li>• coursework essays (D1 - D5);</li> <li>• dissertation (D1- D5).</li> </ul>

### PG Dip INTENDED LEVEL OUTCOMES

<p><b>A: Knowledge and understanding</b></p> <p>This level provides opportunities for students to develop and demonstrate knowledge and understanding of:</p>	<p>The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the level learning outcomes:</p>
