AIMS OF THE DOCUMENT

The aims of this document are to:

- define the structure of the programme;
- specify the programme award titles;
- identify programme and level learning outcomes;
- articulate the regulations governing the awards defined within the document.

AIMS OF THE PROGRAMME

This programme aims to develop critically informed, agile and resourceful graduates, who:

- have the versatility and professional qualities necessary to work in global finance and economic context;
- are critically aware of the wider impact of economic and financial decisions on organisational stakeholders and the wider economy;
- have highly-developed interpersonal and analytical skills;
- are able to manage their own personal development and lifelong learning.

ALIGNMENT WITH THE UNIVERSITY'S STRATEGIC PLAN

The proposed framework will create a stimulating, challenging and rewarding university experience through a clear focus on Bournemouth University's strategic plan (BU2025) and the university's unique fusion of excellent research, education and professional practice. This approach will inform our teaching practices, which will focus on professional and research informed content. The BU Business School is dedicated to being an internationally recognised thought-leader and has a team of talented staff with excellent reputations in terms of outstanding or emerging research and professional practice. Moreover, our staff will utilise their talents to create an exceptional student learning experience through the use of inspirational and technology enhanced teaching methods. Students will be provided with an opportunity to learn from this integration of professional practice and cutting-edge research through the use of work-related learning materials and real-world and problem solving assessment.

LEARNING HOURS AND ASSESSMENT

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. The minimum credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the student, including lectures, seminars, assessment and independent study. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits.

The assessment workload for a unit should consider the total time devoted to study, including the assessment workload (i.e. formative and summative assessment) and the taught elements and independent study workload (i.e. lectures, seminars, preparatory work, practical activities, reading, critical reflection).

Assessment per 20 credit unit should normally consist of 3,000 words or equivalent. Dissertations and Level 6 and 7 Final Projects are distinct from other assessment types. The word count for these assignments is 5,000 words per 20 credits, recognising that undertaking an in-depth piece of original research as the capstone to a degree is pedagogically sound.

STAFF DELIVERING THE PROGRAMME

Students will usually be taught by a combination of senior academic staff with others who have relevant expertise including – where appropriate according to the content of the unit – academic staff, qualified professional practitioners, demonstrators/technicians and research students.
